Community Garden Crawl visits St Alban's Community Garden

Members of the Community Garden Tour organised by the Lake Macquarie City Council and The Hunter Institute of TAFE visited St Alban's Community Garden on Saturday 17 November.

The tour had been organised to recognise the number and significance of community gardens within the Lake Macquarie area and included visits to the Yunung Community Garden at Morisset, the Landcare Resource Centre at Teralba, the Windale Community Garden at the Lake Macquarie PCYC, the Belmont Neighbourhood Centre Habitat in Harmony and St Luke's Community Garden at Belmont.

Participants enjoyed the opportunity to witness first hand the great diversity and enthusiasm that exists within the different groups and to recognise the value that community gardens are providing within the various local communities. A network of contacts is being established so that experiences can be shared among the groups.
